

Role-Based Recruitment & Assessment Platform

Functional Specification & Architecture Document

1. Executive Summary & System Overview

This specification outlines the functional architecture and user interface layout for a multi-tenant, role-based Recruitment & Assessment Platform. The system is partitioned into five distinct portals to optimize operational efficiency, security, and user experience:

1. **Admin Portal:** System-wide management, global configuration, user administration, and security controls.
2. **Manager Portal:** Executive oversight, workforce planning, approval workflows, and high-level talent pipeline analytics.
3. **HR Portal:** End-to-end recruitment operations, job posting management, scheduling, candidate pipeline tracking, and offer workflows.
4. **Interviewer Portal:** Focused workspace for assigned technical/behavioral evaluations, question banking, and candidate scoring.
5. **Candidate Portal:** Streamlined, distraction-free experience for applications, assessments, scheduling, and onboarding status.

1. ADMIN — Admin Portal

- **System Analytics:** API usage metrics, active user sessions, test queue status, and system latency indicators.
- **Organization Overview:** Active job requisitions, total active candidates, completed assessments, and subscription/license usage.
- **Security Alerts:** Flagged proctoring anomalies, failed login attempts, and role permission audits.

Pages & Modules

1. **User Management:**
 - User directory (Create, Read, Update, Delete users).
 - Enterprise Role Assignment (Admin, Manager, HR, Interviewer).
2. **Global Question & Test Bank:**
 - Universal library of assessment templates (Coding, Multiple Choice, Video Response, Psychometric).
 - Automated grading rule configuration (scoring weights, custom test suites).

2. MANAGER — Manager Portal

- **Headcount Metrics:** Open positions vs. filled positions within the manager's department.
- **Action Required:** Pending requisition approvals, offer approvals, and team interview score approvals.

Pages & Modules

1. **Job Requisitions:**
 - Create/Request new job openings.
 - Approve or request edits to job requisitions within their department.
2. **Departmental Pipeline:**
 - View candidate progress per department job opening.
 - Review aggregated scorecard summaries (high-level radar charts, overall interviewer recommendations).
 - Move candidates to final approval/rejection stages.

Manager Exclusions (Should NOT see):

- User management and platform security settings.
- Global test/question creation and scoring rule configuration.
- Granular test proctoring logs or raw technical test code execution outputs.
- Candidates outside their assigned department/requisitions.

3. HR — HR Portal

HR Dashboard

- **Active Recruitment Funnel:** Total active candidates across all stages.
- **Today's Schedule:** Upcoming interviews, test deadlines, and pending offer signatures.

Pages & Modules

1. **Job Management:**
 - Create, publish, edit, and archive job postings across internal/external job boards.
 - Assign hiring managers, recruiters, and interviewing panels to jobs.
2. **Assessment Management:**
 - Assign tests to candidates (manual or automated).
 - Review automated grading results, proctoring risk scores, and flags.
 - Send test reminders and extend submission deadlines.

4. INTERVIEWER — Interviewer Portal

Interviewer Dashboard

- **Upcoming Interviews:** Daily/weekly schedule of assigned candidate evaluation rounds.
- **Pending Feedback:** List of completed interviews requiring scorecard submission.

Pages & Modules

1. My Interviews:

- Candidate background view (resume, experience summary, previous stage notes if permitted).
- Integrated video conferencing link.
- Structured evaluation rubric (custom rating scales, mandatory commentary).

2. Assigned Assessments:

- Candidate assessment submission viewer (test submissions, video responses, essay answers).
- Manual grading interface for subjective or open-ended questions.

Visibility Rule: Interviewers can only access candidates, interview rounds, and tests specifically assigned to them or created by them, preventing unauthorized access to broader hiring pipelines.

5. CANDIDATE — Candidate Portal

Candidate Dashboard

- **Application Status Card:** Current stage in the hiring process for active applications.
- **Action Items:** Pending assessments, upcoming scheduled interviews, and document requests.

Pages & Modules

1. My Applications:

- List of active and archived job applications.
- Stage tracking (e.g., Application Received -> Assessment Pending -> Interview -> Decision).

2. Assessment Workspace:

- Hardware check (webcam, microphone, screen sharing permissions, system setup).
- Proctoring feedback indicators (clear rules on allowed browser behaviors).

3. Interview Schedule:

- Interview time slots.
- Video interview lobby access.
